

# 15th RDKit UGM Agenda v1.0

16-18 September 2026

Darmstadt, Germany

The UGM will be an in-person event with the presentations lived-streamed via zoom. If you have registered for the virtual version of the UGM, you will get an email a day or two before it starts with the zoom link.

In past years we have used discord for online discussion about the UGM. After having gotten feedback that discord is being blocked by some companies, this time we're trying out Zulip: <https://rdkit.zulipchat.com/#narrow/channel/584548-2026-UGM>

The Github repo for this year is here: [https://github.com/rdkit/UGM\\_2026](https://github.com/rdkit/UGM_2026)

The most recent version of this document, logistics information, and other practical details can be found in the [github repo](#).

## Wednesday 16 September

| Time (CEST)   |                                                                                                                                        |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------|
| 08:30 - 09:00 | Check-in / registration                                                                                                                |
| 09:00 - 10:00 | <b>Greg Landrum</b> Welcome, State of the RDKit, and What's New part 1                                                                 |
| 10:00 - 10:30 | <b>Niels Maeder</b> ETKDGv4: Next generation conformer generator in the RDKit                                                          |
| 10:30 - 11:30 | Coffee and posters                                                                                                                     |
| 11:30 - 11:50 | <b>Paolo Tosco</b> Pep-tidying: challenges in curating heterogeneous peptide datasets                                                  |
| 11:50 - 12:10 | <b>Jakub Adamczyk</b> MolPILE - large-scale dataset for molecular representation learning                                              |
| 12:10 - 12:30 | <b>Kevin Boyd</b> Substructure Search on the GPU with nvMolKit                                                                         |
| 12:30 - 13:30 | Lunch and posters                                                                                                                      |
| 13:30 - 14:00 | Lightning talks 1                                                                                                                      |
| 14:00 - 14:30 | <b>David Cosgrove</b> Shape-based similarity searching in synthon space.                                                               |
| 14:30 - 15:00 | <b>Alister Goodfellow</b> Embedding and stereochemistry for transition metal complexes                                                 |
| 15:00 - 16:00 | Coffee and posters                                                                                                                     |
| 16:00 - 16:30 | <b>Hannah Baumann</b> Making alchemical free energy calculations practical at scale with OpenFE                                        |
| 16:30 - 17:00 | <b>Maciej Wójcikowski</b> Accelerating massive substructure matching with roaring bitmaps                                              |
| 17:00 - 17:30 | <b>Masaya Fujii</b> Dynamic Attention-Based Substructure Hierarchy for surface area assignment                                         |
| 19:00 - 23:00 | Conference Dinner at "Das Roeders" - <a href="https://maps.app.goo.gl/jDEXjroMJspm7iWA6">https://maps.app.goo.gl/jDEXjroMJspm7iWA6</a> |

## Thursday 17 September

| Time (CEST)   |                                                                                                                               |
|---------------|-------------------------------------------------------------------------------------------------------------------------------|
| 08:30 - 09:00 | Check-in / registration                                                                                                       |
| 09:00 - 09:30 | What's new 2                                                                                                                  |
| 09:30 - 10:00 | <b>Andrew Dalke</b> Approximating Count Fingerprints with Binary                                                              |
| 10:00 - 10:30 | <b>Michel Lim</b> Understanding the role of aromaticity in tautomeric equilibria                                              |
| 10:30 - 11:30 | Coffee and posters                                                                                                            |
| 11:30 - 11:50 | <b>Hagen Muenkler</b> qm_atlas: End-to-End Automation of Quantum Chemistry Workflows for Molecular Property Prediction        |
| 11:50 - 12:10 | <b>Piotr Ludynia</b> Particularly strong and robust performance of fingerprint-based approach for peptide function prediction |
| 12:10 - 12:30 | <b>Thomas Wolf</b> Mother ML: A Modular Framework for Reproducible Cheminformatics                                            |
| 12:30 - 13:30 | Lunch and posters                                                                                                             |
| 13:30 - 14:00 | Lightning Talks 2                                                                                                             |
| 14:00 - 14:30 | <b>Gregori Gerebtzoff</b> Comprehensive bio-transformation analysis of oligonucleotides with RDKit                            |
| 14:30 - 15:00 | <b>Martin Fitzner</b> Chemical Encodings for Bayesian Optimization in the Real World                                          |
| 15:00 - 15:30 | Coffee and posters                                                                                                            |
| 15:30 - 16:00 | What's new 3                                                                                                                  |
| 16:00 - 16:30 | t.b.d.                                                                                                                        |
| 16:30 - 17:00 | <b>Roger Sayle</b> Roger's talk                                                                                               |
| 17:00 - 17:30 | Wrap up                                                                                                                       |
| 19:00 - 23:00 | Dinner: small groups at local restaurants                                                                                     |

# Lightning Talks

## **Session 1**

Oscar Palomino-Hernandez

Anna Santura

Carl Schiebroek

Thomas Evangelidis

Hideyoshi Fuji

Rostislav Fedorov

## **Session 2**

Esben Jannik Bjerrum

Wim Dehaen

Jakub Adamczyk

Jonathan Zheng

Adam Staniszewski

## Friday 17 September

|              |                                 |
|--------------|---------------------------------|
| Time (CEST)  |                                 |
| 9:00 - 9:30  | Check-in / registration         |
| 9:30 - 16:00 | <b>Hackathon! and Workshops</b> |

The hackathon is, as always, spontaneously organized and informal.

In addition to the normal hackathon, we will have three workshops/tutorials on Friday morning:

## Sponsors

The RDKit UGM can only take place in its current form thanks to the generous financial support of our sponsors.

### Gold

**Schrödinger**

### Bronze
